# INSTALLATION

**1.Go to the menu *Modules* → *Modules of your PrestaShop***

**2.Click on *Add a new module* (on the top right corner)**

**3.Click on *Choose a file***

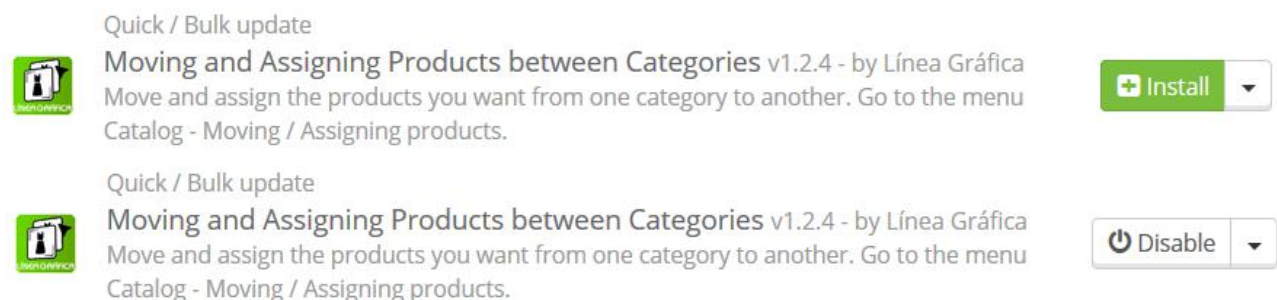

**4.Select the *lgproductmove.zip***

**5.Click on *Upload this module***

**6.Find the *Moving and Assigning Products between Categories* module**

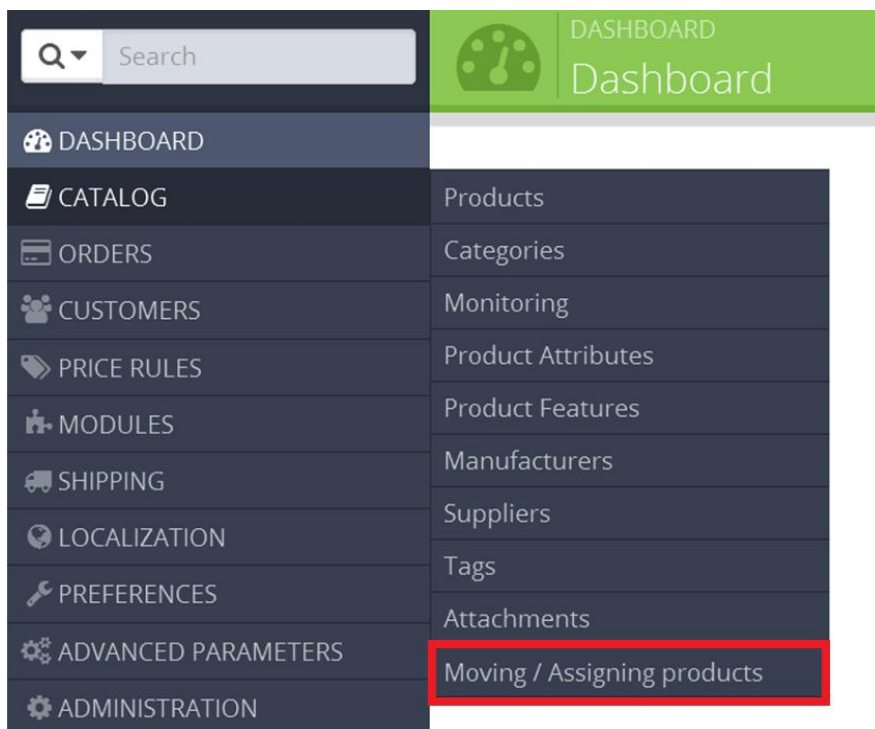

**7.Click on *Install***

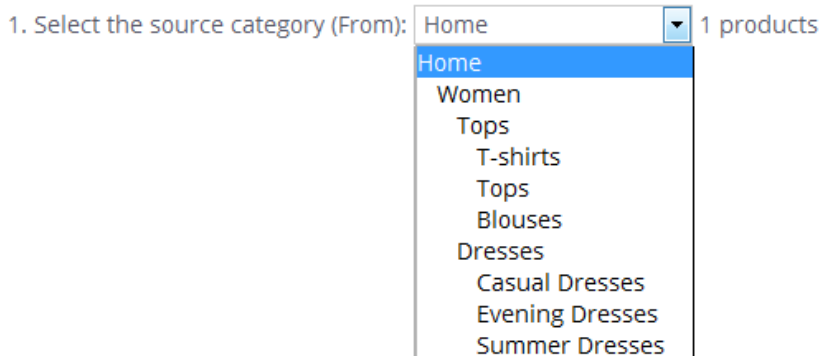

**If you get an error during the installation, [please read the section 1 of our FAQ.](#)**

# HOW TO USE THE MODULE

**1.Go to the menu *Catalog* and click on the tab *Moving / Assigning products***

**2.Select the source category from which you want to move / assign products**

### 3. Tick the product(s) of this category that you want to move / assign to another category

SELECTION	ID	IMAGE	NAME	MANUFACTURER	DATE	PRICE	STOCK	STATUS
<input checked="" type="checkbox"/>	3		Printed Dress	Fashion Manufacturer	09-09-2014 11:09:04	26,00	899	✓
<input type="checkbox"/>	4		Printed Dress	Fashion Manufacturer	09-09-2014 11:09:04	50,99	900	✓
<input checked="" type="checkbox"/>	5		Printed Summer Dress	Fashion Manufacturer	09-09-2014 11:09:04	30,51	3600	✓

If you have a lot of products, you can use the filter to sort our your products, by name, manufacturer and/or status

Filter the products by

Name:  Manufacturer:  Status:

**The “Select all” option applies to the whole selected category and doesn't take in account the filters**

### 4. Select the destination category to which you want to move / assign the selected products

3. Select the destination category (To):

- Home
- Women
- Tops
- T-shirts
- Tops
- Blouses
- Dresses**
- Casual Dresses
- Evening Dresses
- Summer Dresses

### 5. Choose to move or assign the products to another category

4. Choose to:

**Move the selected products to the destination category**

Display the selected products in both categories

### 6. Click on the button

Confirm

# MOVING PRODUCTS BETWEEN TWO CATEGORIES

## Moving/Assigning Products

1. Select the source category (From):  7 products 
2. Tick the products you want to move/assign in the column SELECTION (in the table below)
3. Select the destination category (To):
4. Choose to:

## CATEGORY A BEFORE

SELECTION	ID	IMAGE	NAME
<input checked="" type="checkbox"/>	3		Printed Dress
<input type="checkbox"/>	4		Printed Dress
<input checked="" type="checkbox"/>	5		Printed Summer Dress
<input type="checkbox"/>	6		Printed Summer Dress

## CATEGORY A AFTER

SELECTION	ID	IMAGE	NAME
<input type="checkbox"/>	4		Printed Dress
<input type="checkbox"/>	6		Printed Summer Dress

## CATEGORY B BEFORE

SELECTION	ID	IMAGE	NAME
<input type="checkbox"/>	1		Faded Short Sleeve T-shirts
<input type="checkbox"/>	2		Blouse

## CATEGORY B AFTER

SELECTION	ID	IMAGE	NAME
<input type="checkbox"/>	1		Faded Short Sleeve T-shirts
<input type="checkbox"/>	3		Printed Dress
<input type="checkbox"/>	2		Blouse
<input type="checkbox"/>	5		Printed Summer Dress

# ASSIGNING PRODUCTS IN ANOTHER CATEGORY

## Moving/Assigning Products

1. Select the source category (From): Summer Dresses ▾ 7 products 
2. Tick the products you want to move/assign in the column SELECTION (in the table below)
3. Select the destination category (To): Evening Dresses ▾
4. Choose to: Display the selected products in both categories ▾

## CATEGORY A BEFORE

SELECTION	ID	IMAGE	NAME
<input type="checkbox"/>	5		Printed Summer Dress
<input checked="" type="checkbox"/>	6		Printed Summer Dress
<input checked="" type="checkbox"/>	7		Printed Chiffon Dress

## CATEGORY B BEFORE

SELECTION	ID	IMAGE	NAME
<input type="checkbox"/>	4		Printed Dress

## CATEGORY A AFTER

SELECTION	ID	IMAGE	NAME
<input type="checkbox"/>	5		Printed Summer Dress
<input type="checkbox"/>	6		Printed Summer Dress
<input type="checkbox"/>	7		Printed Chiffon Dress

## CATEGORY B AFTER

SELECTION	ID	IMAGE	NAME
<input type="checkbox"/>	4		Printed Dress
<input type="checkbox"/>	6		Printed Summer Dress
<input type="checkbox"/>	7		Printed Chiffon Dress

# FAQ – COMMON ERRORS

All the common errors about this module have been reported below and we explain to you in details how to solve them.

Please read the section that corresponds to your problem **BEFORE** getting in touch with us, you will probably find the answer to your problem in it.

I) I don't manage to install the module.....9

II) I have a problem with the product images.....9

2.1 The images are missing.....9

2.2 The images are the same.....10

III) The module doesn't move the products.....11

If the problem you are having is not listed, then please get in touch with us.

## I) I don't manage to install the module

When installing the module, you may encounter this error message:

*File too large (limit of \*\*\*\*\* bytes)*

**Reason of the error:** The problem comes from the value of your 'upload\_max\_filesize' variable that is not large enough compared to the module size.

**To solve the problem, you can either :**

- Go to your FTP and increase the value of your 'upload\_max\_filesize' variable in the file "/config/ config.inc.php" or in the file "php.ini"  
`ini_set('upload_max_filesize', '100M');`
- Or install the module directly from your FTP, you just need to unzip the module zip file and copy/paste the folder "lgproductmove" inside the folder "modules" of your FTP (the module will appear in your back-office as soon as the module folder is added into the "modules" folder).

## II) I have a problem with the product images

### 2.1 The images are missing

The module uses by default the thumbnails generated by *PrestaShop*.

ID	Image	Name	Reference	Manufacturer	Price	Quantity	Date	Status	Position
1		Faded Short Sleeves T-shirt	demo_1	Fashion Manufacturer	16,51 €	1799	07/10/2015	✓	0
2		Blouse	demo_2	Fashion Manufacturer	27,00 €	1799	07/10/2015	✓	1

**Reason of the error:** If the product images don't appear inside our module, it means that the thumbnails have not been generated on your store.

**To solve the problem:** Go to the page *Catalog* → *Products* of your shop and wait until all the thumbnails are generated (complete loading of the page).

CATALOG / PRODUCTS									
Products									
				Add new product		Recommended Modules		Help	
1		Faded Short Sleeve T-shirts	demo_1	Home	16,55 €	20,03 €	1763	✓	Edit
2		Blouse	demo_2	Women	27,00 €	27,00 €	8	✗	Edit

→ **These are the thumbnails used inside our module**

If you have several pages of products in *Catalog* → *Products*, you can increase the number of products displayed by page or go to each one of your pages in order to make sure you have generated the thumbnails for all your products.

## 2.2 The images are the same

The image of a same product may appear for other products.

ID	Image	Name	Reference	Manufacturer	Price	Quantity	Date	Status	Position
1		Faded Short Sleeves T-shirt	demo_1	Fashion Manufacturer	16,51 €	1799	07/10/2015		0
2		Blouse	demo_2	Fashion Manufacturer	27,00 €	1799	07/10/2015		1

**Reason of the error:** The value of your variable *max\_input\_vars* is too low compared to the number of products the module has to displayed and can't send all the images.

**To solve the problem, you can either :**

- Contact your hosting company so that they can increase the value of the variable *max\_input\_vars* (it must superior to the number of products in the current category)
- OR increase yourself the value of this variable on your server [following these instructions](#)

## III) The module doesn't move the products

**3.1** Make sure that the option “Default order by : Position inside category” is selected in the menu “Preferences” → “Products”

**3.2** Make sure that the non PrestaShop modules are not disabled in the menu “Advanced parameters” → “Performance”

**3.3** Increase the value of the variable “*max\_input\_vars*”

**Reason of the error:** The module sends a number of POST requests that is superior than the limit set on your store or server and therefore the requests cannot be processed.

**Advice:** The value of the variable “max\_input\_vars” must be superior to the number of products there are inside the selected category.

**To solve the problem:** Increase the value of the variable *max\_input\_vars* according to your number of products inside the:

► *php.ini* file (if the limit is set on your server)

```
max_input_vars = 5000
```

► *.htaccess* file (if the limit is set on your store)

```
php_value max_input_vars 5000
php_value suhosin.post.max_vars 5000
php_value suhosin.request.max_vars 5000
# ~~start~~
```

For more information, please visit this page:

<http://blog.smarchal.com/prestashop-et-max-input-var>

If you don't manage to increase this variable, please contact your hosting so that they can increase it for you.

# YOUR OPINION

Please take the time to rate our module after buying it. This is quick, constructive for other PrestaShop users and it helps us develop our activity.

<http://addons.prestashop.com/en/ratings.php>

If you have a problem with our module, please get in touch with us before leaving a feedback, our technical support will do all its best to solve your problem.
