INSTALLATION

1. Go to the menu *Modules* → *Modules of your PrestaShop*

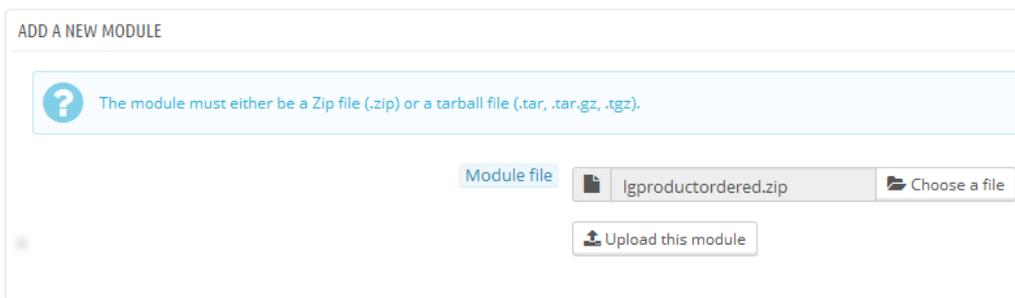

2. Click on *Add a new module* (on the top right corner)

3. Click on *Choose a file*

4. Select the *lgproductordered.zip* file

5. Click on *Upload this module*

6. Find the *Sorting Out Products by Category - Display Order*

7. Click on *Install*

Quick / Bulk update

Sorting Out Products by Category - Display Order v1.3.4 - by Línea Gráfica
Sort all your categories by price, sales, quantity, date, name, ID, reference or custom order. Go to the menu Catalog - Sorting out products.

Quick / Bulk update

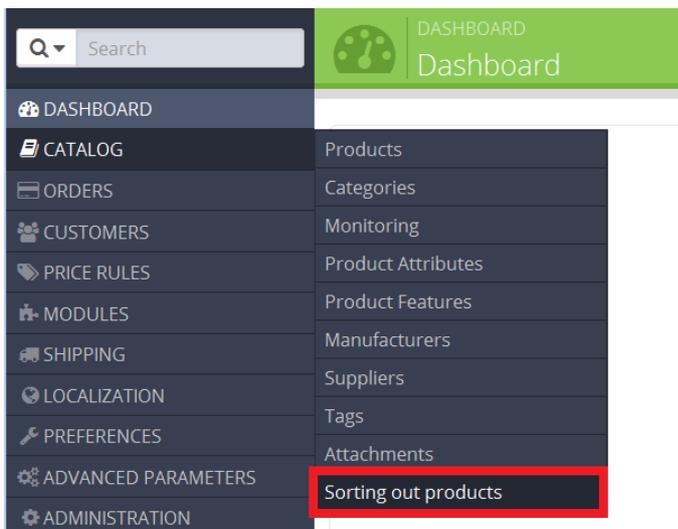

Sorting Out Products by Category - Display Order v1.3.4 - by Línea Gráfica
Sort all your categories by price, sales, quantity, date, name, ID, reference or custom order. Go to the menu Catalog - Sorting out products.

If you get an error during the installation, [please read the section 1 of our FAQ.](#)

HOW TO USE THE MODULE

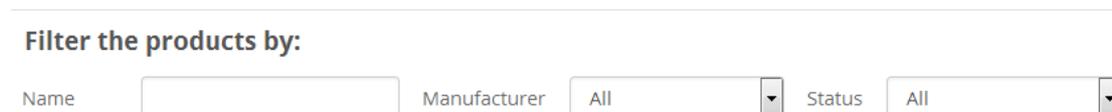

1.Go to the menu *Catalog* and click on the tab *Sorting out products*

2.Select the category or sub-category you want to sort out

3.Use the product filter to filter products among the selected category (optional)

The module applies the order to the whole category and doesn't take into account the filters.

4. Click on the type of order you want to apply, you can choose between these different 15 orders:

Sort the products by:

ID - Ascending ↓ ₁	Name - Ascending ↓ _A	Reference - Ascending ↓ _A	Sales - Ascending ↓ ₁
ID - Descending ↓ ₁	Name - Descending ↓ _A	Reference - Descending ↓ _A	Sales - Descending ↓ ₁
Price - Ascending ↓ ₁	Quantity - Ascending ↓ _E	Date - Ascending ↓ ₁	Custom Order  ("Position" column)
Price - Descending ↓ ₁	Quantity - Descending ↓ _E	Date - Descending ↓ ₁	

For the custom order, associate a number to each product in the *Position* column and then click on the *Custom Order* button

SORTING OUT PRODUCTS

ID	Image	Name	Reference	Manufacturer	Sales	Price	Quantity	Date	Status	Position
7		Tendance - Printed Chiffon Dress	#REF-007	Fashion Manufacturer	32	20,50 €	1184	2014-09-09		<input type="text" value="0"/>
1		Fashion - Faded Short Sleeve T-shirt	#REF-001	Fashion Manufacturer 2	8	24,79 €	439	2014-09-09		<input type="text" value="1"/>
3		Tendance - Short Printed Dress	#REF-003	Fashion Manufacturer	12	26,00 €	912	2014-09-09		<input type="text" value="2"/>
2		Tendance - Dark Blouse	#REF-002	Fashion Manufacturer 2	15	27,00 €	1780	2014-09-09		<input type="text" value="3"/>

5		Fashion - Long Summer Dress	#REF-005	Fashion Manufacturer	14	30,51 €	499	2014-09-09		<input type="text" value="5"/>
4		Tendance - Long Printed Dress	#REF-004	Fashion Manufacturer	11	50,99 €	886	2014-09-09		<input type="text" value="6"/>

5. Refresh the page (F5) in the front-office to see the changes

FAQ – COMMON ERRORS

All the common errors about this module have been reported below and we explain to you in details how to solve them.

Please read the section that corresponds to your problem **BEFORE** getting in touch with us, you will probably find the answer to your problem in it.

I) I don't manage to install the module.....7

II) I have a problem with the product images.....7

2.1 The images are missing.....7

2.2 The images are the same.....8

III) The order doesn't apply in my front-office.....8

If the problem you are having is not listed, **then please get in touch with us.**

I) I don't manage to install the module

When installing the module, you may encounter this error message:

*File too large (limit of ***** bytes)*

Reason of the error: The problem comes from the value of your 'upload_max_filesize' variable that is not large enough compared to the module size.

To solve the problem, you can either :

- Go to your FTP and increase the value of your 'upload_max_filesize' variable in the file "/config/ config.inc.php" or in the file "php.ini"
ini_set('upload_max_filesize', '100M');
- Or install the module directly from your FTP, you just need to unzip the module zip file and copy/paste the folder "lgproductordered" inside the folder "modules" of your FTP (the module will appear in your back-office as soon as the module folder is added into the "modules" folder).

II) I have a problem with the product images

2.1 The images are missing

The module uses by default the thumbnails generated by *PrestaShop*.

ID	Image	Name	Reference	Manufacturer	Price	Quantity	Date	Status	Position
1		Faded Short Sleeves T-shirt	demo_1	Fashion Manufacturer	16,51 €	1799	07/10/2015		<input type="text" value="0"/>
2		Blouse	demo_2	Fashion Manufacturer	27,00 €	1799	07/10/2015		<input type="text" value="1"/>

Reason of the error: If the product images don't appear inside our module, it means that the thumbnails have not been generated on your store.

To solve the problem: Go to the page *Catalog* → *Products* of your shop and wait until all the thumbnails are generated (complete loading of the page).

CATALOG / PRODUCTS		Products		 Add new product	 Recommended Modules	 Help				
<input type="checkbox"/>	1		Faded Short Sleeve T-shirts	demo_1	Home	16,55 €	20,03 €	1763		 Edit
<input type="checkbox"/>	2		Blouse	demo_2	Women	27,00 €	27,00 €	8		 Edit

→ **These are the thumbnails used inside our module**

If you have several pages of products in *Catalog* → *Products*, you can increase the number of products displayed by page or go to each one of your pages in order to make sure you have generated the thumbnails for all your products.

2.2 The images are the same

The image of a same product may appear for other products.

ID	Image	Name	Reference	Manufacturer	Price	Quantity	Date	Status	Position
1		Faded Short Sleeves T-shirt	demo_1	Fashion Manufacturer	16,51 €	1799	07/10/2015	<input checked="" type="checkbox"/>	<input type="text" value="0"/>
2		Blouse	demo_2	Fashion Manufacturer	27,00 €	1799	07/10/2015	<input checked="" type="checkbox"/>	<input type="text" value="1"/>

Reason of the error: The value of your variable *max_input_vars* is too low compared to the number of products the module has to displayed and can't send all the images.

To solve the problem, you can either :

- Contact your hosting company so that they can increase the value of the variable *max_input_vars* (it must superior to the number of products in the current category)
- OR increase yourself the value of this variable on your server [following these instructions](#)

III) The order doesn't change in my front-office

3.1 Make sure that the option “Default order by : Position inside category” is selected in the menu “Preferences” → “Products”

3.2 Make sure that the non PrestaShop modules are not disabled in the menu “Advanced parameters” → “Performance”

3.3 If you use the module “Layered navigation block” (blocklayered), disable the option “Show products from subcategories”

3.4 Increase the value of the variable “*max_input_vars*”

Reason of the error: The module sends a number of POST requests that is superior than the limit set on your store or on your server and therefore the requests cannot be processed.

Advice: The value of the variable “*max_input_vars*” must be superior to the number of products there are inside the selected category.

To solve the problem: Increase the value of the variable *max_input_vars* according to your number of products inside the:

► *php.ini* file (if the limit is set on your server)

```
max_input_vars = 5000
```

► *.htaccess* file (if the limit is set on your store)

```
php_value max_input_vars 5000
php_value suhosin.post.max_vars 5000
php_value suhosin.request.max_vars 5000
# ~~start~~
```

For more information, please visit this page:

<http://blog.smarchal.com/prestashop-et-max-input-var>

If you don't manage to increase this variable, please contact your hosting so that they can increase it for you.

YOUR OPINION

Please take the time to rate our module after buying it. This is quick, constructive for other PrestaShop users and it helps us develop our activity.

<http://addons.prestashop.com/en/ratings.php>

If you have a problem with our module, please get in touch with us before leaving a feedback, our technical support will do all its best to solve your problem.
