GENERATE SITEMAPS

2.Select the type of sitemap you want to generate and click on *Save configuration*

EMAIL CONFIRMATION CONFIGURE SITEMAPS GENERATE SITEMAPS

Type of sitemap: 

Choose the type of sitemap you want to generate.

Shop: 

Choose the shop for which you want to generate sitemaps (multistore).

Priority: 

Choose the priority of these URLs compared to all the other URLs on yc

Frequency: 

Indicate how frequently your pages are likely to change.

Include images: YES NO

Enable this option if you want to index your images.

Send notification to search engines: YES NO

Enable this option if you want to notify Google, Bing and Ask that this sit

 Save configuration

3. Once the sitemap is configured, the sitemap is added in the tab *Generate sitemaps*

ID	Type	Frequency	Priority	Shop	Include images	Notification to search engines	Generated sitemaps
1	Products	monthly	0.9	Lineagrafica - Prestashop 1.5x modules	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Generated (25-03-2015) <input type="button" value="Generate"/>

4. Click on the button

5. Once the sitemap generated, you can open the sitemap index to access the sitemap

Complete! You can access this sitemap through the sitemap index: http://proyectos-lineagrafica.com/modulesdemo15/en/module/lgsitemaps/sitemap?name=sitemap_1

(Shop: Lineagrafica - Prestashop 1.5x modules) http://proyectos-lineagrafica.com/modulesdemo15/en/module/lgsitemaps/sitemap?name=sitemap_1.xml

You have to create at least one sitemap to be able to see the index. This index includes the urls of all the generated sitemaps. Click on the link above and open the links inside to access the generated sitemaps.

6. You will find inside the index the links to access your sitemaps

</sitemapindex>

```

The sitemaps are stored inside the module, you need to follow the path “/modules/lgsitemaps/” on your FTP to find them.

The module automatically splits the large sitemaps (superior to 50Mo) into several sitemaps so that you can easily submit them to Google.

Here is what Google says about it: :

Break up a large sitemap into a set of smaller sitemaps to prevent your server from being overloaded by serving a large file to Google. A sitemap file can't contain more than 50,000 URLs and must be no larger than 50 MB uncompressed.

Source Google: <https://support.google.com/webmasters/answer/183668?hl=en>

7.To generate sitemaps via the Cron, copy/paste the Cron url into a Cron module or on your hosting panel.

URL to run the Cron task: <http://proyectos-lineagrafica.com/modulesdemo15/en/module/lgsitemaps/cron>

Copy/paste this cron url into your hosting panel or cron module to automatically !

You can also use the free module *Cron tasks manager* included in PrestaShop or the [free Crontab module](#)

8.To submit your sitemap to Google, you just need to:

- **connect to your [Google Webmaster Tools](#) account**

- **click on the button** 

- **submit the url of the sitemap index**

Index of your sitemaps: ([Shop: Lineagrafica - Prestashop 1.5x modules](#)) http://proyectos-lineagrafica.com/modulesdemo15/en/module/lgsitemaps/sitemap?name=sitemap_1.xml

The sitemap index allows you to simplify the management of multiple sitemaps. Here is what Google says about it:

If you have many sitemaps, you can use a sitemaps index file as a way to submit them at once.

Source Google: <https://support.google.com/webmasters/answer/75712?hl=en>

CONFIGURE SITEMAPS

EMAIL CONFIRMATION

CONFIGURE SITEMAPS

GENERATE SITEMAPS

You have to configure each sitemap one by one.

1. Choose the type of sitemap to configure

Type of sitemap:

- Products
- Categories
- CMS
- Manufacturers

The Product sitemap contains the urls of all your product sheets
 The Category sitemap contains the urls of all your categories and sub-categories
 The CMS sitemap contains the urls of all your CMS pages
 The Manufacturer sitemap contains the urls of all your manufacturer pages

2. Choose for which store you want to configure the sitemap (multistore mode)

Shop:

- Shop 1
- Shop 2

Example: Product sitemap for *Shop 1*

3. Indicate the priority of indexation of this sitemap compared to your other sitemaps (1.0 means very important and 0.1 means not important)

Priority:

- 0.1
- 0.2
- 0.3
- 0.4
- 0.5
- 0.6
- 0.7
- 0.8
- 0.9
- 1

Here is what Google says about the <priority> tag:

Describes the priority of a URL relative to all the other URLs on the site. This priority can range from 1.0 (extremely important) to 0.1 (not important at all). Note that the priority tag does not affect your site ranking in Google search results. Priority values are only considered relative to other pages on your site so, assigning a high priority (or specifying the same priority for all URLs) will not boost your entire site search ranking.

Source Google: <https://support.google.com/webmasters/answer/183668?hl=en>

4.Indicate how frequently the pages contained into the sitemap are supposed to be modified

Frequency

- Daily
- Monthly**
- Yearly

Here is what Google says about the <changefreq> tag:

Provides a hint about how frequently the page is likely to change

Source Google:
<https://support.google.com/webmasters/answer/183668?hl=en>

5.Choose to include or not the urls of the images into the sitemap (indexation of the images into the image search engine)

Include images: YES NO

6.Choose to inform or not the search engines Google, Bing and Ask about the sitemap creation (ping request)

Send notification to search engines: YES NO

7.Click on

EMAIL CONFIRMATION

EMAIL CONFIRMATION

CONFIGURE SITEMAPS

GENERATE SITEMAPS

The module allows you to receive notifications by email every time the sitemaps are generated.

1. Choose to receive or not these notifications by email

Enable email alerts:

YES

NO

2. Indicate your email address

Email address:

your.email@email.com

3. Click on

Save configuration

YOUR OPINION

Please take the time to rate our module after buying it. This is quick, constructive for other PrestaShop users and it helps us develop our activity.
