INSTALLATION

1.Go to the menu *Modules* → *Modules* of your PrestaShop

2.Click on *Add a new module* (on the top right corner)

3.Click on *Choose a file*

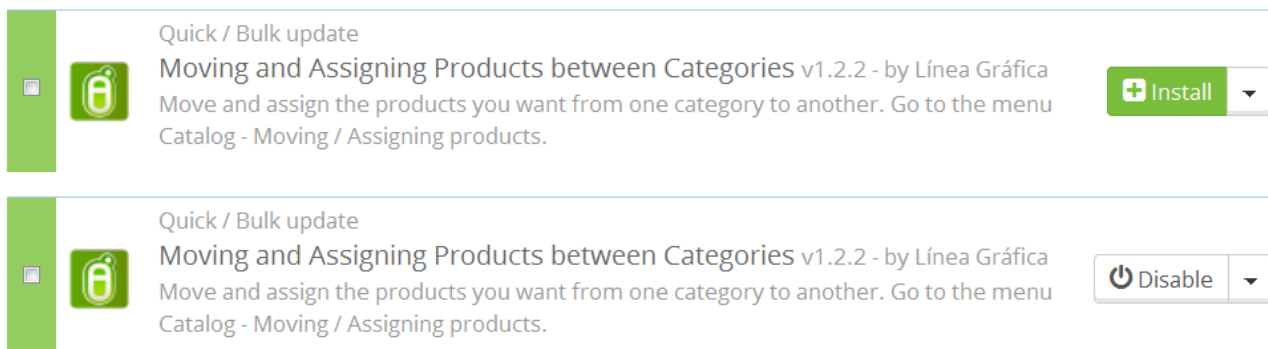

4.Select the *lgproductmove.zip*

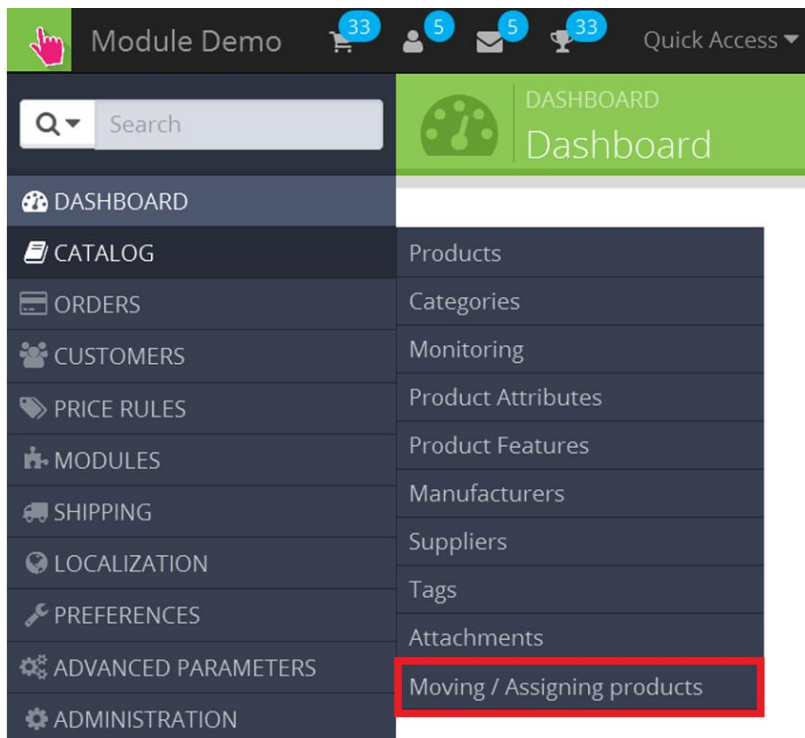

5.Click on *Upload this module*

6.Find the *Moving and Assigning Products between Categories* module

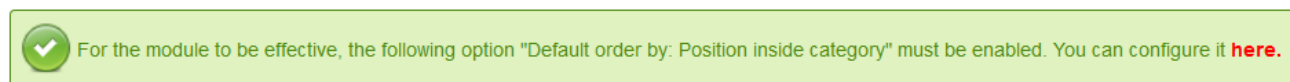

7.Click on *Install*

8. Go to the *Catalog* menu and click on the new *Moving / Assigning products* tab

9. Click on the red link (inside the green block) or go to *Preferences -> Products -> Pagination*

10. Make sure that the *Default order by: Position inside the category* option is selected and save.

The screenshot shows the 'PAGINATION' settings form. It has a title 'PAGINATION' with a gear icon. There are three main settings: 'Products per page' with a text input field containing '12'; 'Default order by' with a dropdown menu showing 'Position inside category'; and 'Default order method' with a dropdown menu showing 'Ascending'. At the bottom right, there is a 'Save' button with a floppy disk icon.

FAQ – COMMON ERRORS

1. Make sure that the option “Default order by : Position inside category” is selected in the menu “Preferences” → “Products”

Default order by

Position inside category

2. The module doesn't move products between categories

This problem occurs with the categories that contain large numbers of products.

The module sends a number of POST requests that is superior than the limit set on your store or on your server and therefore the requests cannot be processed.

To solve the problem, increase the value of the variable *max_input_vars* according to your number of products inside the:

► *php.ini* file (if the limit is set on your server)

```
max_input_vars = 5000
```

► *.htaccess* file (if the limit is set on your store)

```
php_value max_input_vars 5000
php_value suhosin.post.max_vars 5000
php_value suhosin.request.max_vars 5000
# ~start~
```

For more information, please visit this page:

<http://blog.smarchal.com/prestashop-et-max-input-var>

3.The thumbnails of the products are all the same

SELECTION	ID	IMAGE	NAME	MANUFACTURER	DATE	PRICE	STOCK	STATUS	ORDER
<input type="checkbox"/>	3		Printed Dress	Fashion Manufacturer	18-11-2014 08:31:21	26,00	898	✓	<input type="text" value="0"/>
<input type="checkbox"/>	4		Printed Dress	Fashion Manufacturer	18-11-2014 08:31:21	50,99	900	✓	<input type="text" value="1"/>
<input type="checkbox"/>	5		Printed Summer Dress	Fashion Manufacturer	18-11-2014 08:31:21	30,51	3600	✓	<input type="text" value="2"/>
<input type="checkbox"/>	6		Printed Summer Dress	Fashion Manufacturer	18-11-2014 08:31:21	30,50	900	✓	<input type="text" value="3"/>
<input type="checkbox"/>	7		Printed Chiffon Dress	Fashion Manufacturer	18-11-2014 08:31:21	20,50	1797	✓	<input type="text" value="4"/>

To solve the problem, increase the value of the variable *max_input_vars* (see the previous page)

4.The thumbnails of the products are not displayed

SELECTION	ID	IMAGE	NAME	MANUFACTURER	DATE	PRICE	STOCK	STATUS	ORDER
<input type="checkbox"/>	3		Printed Dress	Fashion Manufacturer	18-11-2014 08:31:21	26,00	898	✓	<input type="text" value="0"/>
<input type="checkbox"/>	4		Printed Dress	Fashion Manufacturer	18-11-2014 08:31:21	50,99	900	✓	<input type="text" value="1"/>
<input type="checkbox"/>	5		Printed Summer Dress	Fashion Manufacturer	18-11-2014 08:31:21	30,51	3600	✓	<input type="text" value="2"/>
<input type="checkbox"/>	6		Printed Summer Dress	Fashion Manufacturer	18-11-2014 08:31:21	30,50	900	✓	<input type="text" value="3"/>

The module uses the thumbnails generated by *PrestaShop*. If the images don't appear inside the module, it means that the thumbnails have not been generated.

To solve the problem, take a look at your catalog of products by going to the menu *Catalog → Products* (in order to generate the thumbnails) and then go back to the tab *Moving / Assigning products*
